

RECOILLESS SCALER/CHIPPER

Ergonomics doesn't have to cost more! Ask our customers! They won't switch back to conventional tools and they don't have to for economical reasons.

HRV-95 is ideal for scaling, light chipping, cleaning of castings and cutting in stone.

- Clean-blowing feature as a standard.
- Low noise level (80 dB(A) idling) and low air consumption.
- Rugged construction with most parts from hardened steel.

The extremely low vibration level lowers fatigue and minimizes long term health risks. 80-90 % less vibration than conventional designs.

SPECIFICATIONS:

Patents Pending

Model	Vibration Level	Blows per minute	Air Cons.	Length	Weight	Hose Conn.	Size Hose Rec.
HRV-95	2m/s ²	9,000	1.5 l/s 3.5 CFM	210 mm 8 1/4"	1.45 kg 3 1/4 lb.	1/4"	1/4"

Performance figures are at 6.5 bar (95 psi) air pressure.

Flat chisels with tips from tungsten carbide for extended life are available in different widths as well as chisels from hardened steel.
