

# Low backlash planetary gearheads General

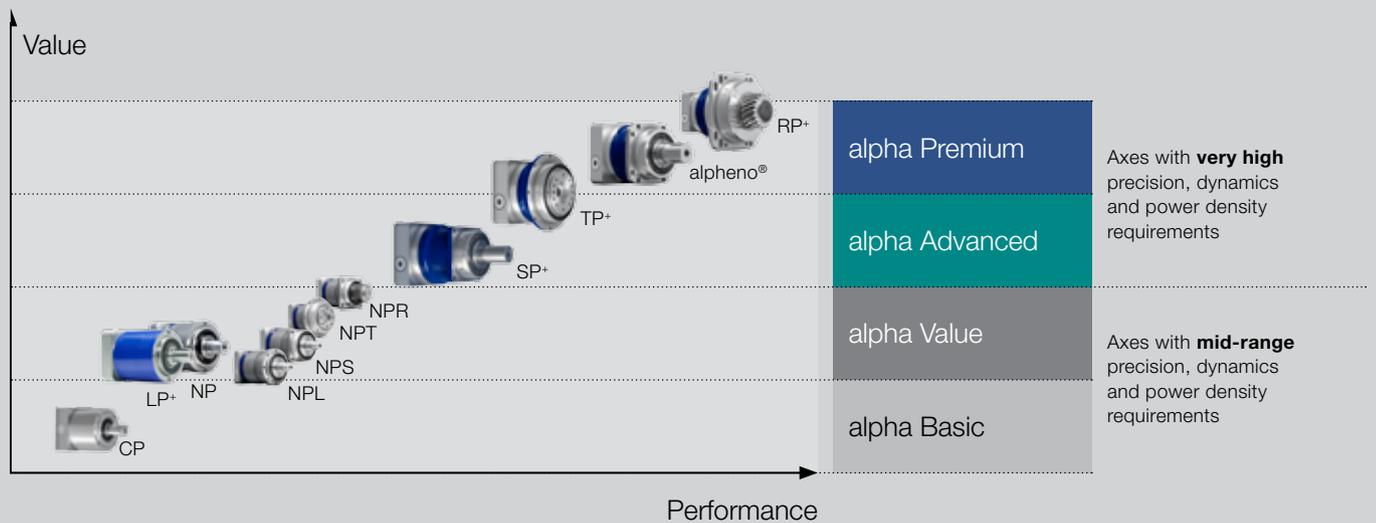

## alpha Value Line

Individual talents

- Low-backlash planetary gearheads with output shaft (NP, NPL, NPS, NPR) or output flange (NPT)
- Applications in cyclic or continuous operation
- Torsional backlash  $\leq 8$  arcmin
- Ratio: 3-100

## Product highlights

- Maximum efficiency
- High flexibility
- New freedom in design

### LP+ Generation 3

Economical multitalent

- Low backlash planetary gearhead with output shaft
- Applications in cyclic or continuous operation
- Torsional backlash  $\leq 8$  arcmin
- Ratio: 3-100

#### Product highlights

- Large range of ratios
- High nominal speeds
- Optionally available with belt pulley

### LPB+ Generation 3

Economical multitalent

- Low backlash planetary gearhead with output flange
- Cyclic or continuous operation
- Torsional backlash  $\leq 8$  arcmin
- Ratio: 3-100

#### Product highlights

- Large range of ratios
- High nominal speeds
- Optionally available with belt pulley

### CP

Economical entry-level model

- Low backlash planetary gearhead with output shaft
- Applications in cyclic or continuous operation
- Torsional backlash  $\leq 20$  arcmin
- Ratio: 4-100

#### Product highlights

- Lightweight aluminum

## Versatile installation

In whatever position you install your gearhead, it always contains the same quantity of grease.

The gearheads are so flexible, you can install them vertically, horizontally or with the output facing upwards or downwards.

## Extended boundaries

Our General range includes some impressive new additions. In the 070, 090 and 120 sizes, our LP+/LPB+ Generation 3 gearheads feature up to 75% more torque, independent of the ratio!

## Just in time

With our General range, this is not merely a slogan. With our General range products, we set new standards with regard to delivery times and delivery reliability.

# alpha Value Line – benefit down to the last detail

## Efficiency on all axes

The alpha Value Line is suitable for universal application and offers the best economical solution for almost every requirement, on each axis and for every sector.

With the alpha Value Line, WITTENSTEIN alpha offers each drive and drive interface as a compatible extension to the existing High End portfolio - for maximum flexibility in design, assembly and application.

## Performance data\*

Torsional backlash [arcmin]	≤ 8
Ratios	3 - 100
Max. torque $T_2$ [Nm]	800
Max. input speed [rpm <sup>-1</sup> ]	10000
Efficiency [%]	97
Max. radial force $F_{zPMax}$ [N]	10000

\* All product variants also available in High TORQUE version.

## Maximum efficiency

The alpha Value Line gearheads are extremely economical to purchase, unbeatably efficient in operation and maintenance free over the entire service life.

## High flexibility

Modular configuration of interfaces to motor and to application. The gearheads are available with different clamping hub diameters, drive stages, design and installation versions.

## Fast availability

With our alpha Value Line, we set new standards regarding delivery times and delivery reliability. Even with large unit volumes.

## New design options

for example, in linear applications with rack and pinion or belt pulley. The NPR version is equipped with an integral slot flange. This enables easy positioning of the pinion or simple tensioning of the belt.

Further information on the alpha Value Line is available online at: [www.wittenstein-alpha.de/alpha-value-line](http://www.wittenstein-alpha.de/alpha-value-line)

Here, you can obtain the appropriate brochure with technical data and dimensioned drawings for each version.

NP

NPS

### alpha Value Linear System

Perfect for linear applications with average demands on positioning accuracy and feed force. Different versions for automation, machine tools and wood working machinery as well as many other applications.

#### Suitable accessories available:

Depending on the requirement, the alpha Value Line can be supplemented with accessories such as metal bellows couplings, elastomer couplings and torque limiters.

Planetary gearheads  
General

alpha Value  
Line

### Maximum reliability

The gearheads are suitable for both cyclic as well as continuous operation.

### Versatile installation

The grease lubrication enables versatile mounting positions. This makes the gearheads so flexible, that they can be installed vertically, horizontally, with the output facing upwards and/or downwards.

### Simple motor installation

Safe, faultless motor installation is possible in a single working step.

### Extremely smooth-running

The gearheads are characterized by maximum smooth running and synchronization quality.

# LP+/LPB+ Generation 3 – Economical multitalent

Low backlash planetary gearheads with output shaft or output flange. The LP+/LPB+ Generation 3 gearhead series combines maximum quality with economical precision. The LPB+ Generation 3 is especially suitable for compact belt drives.

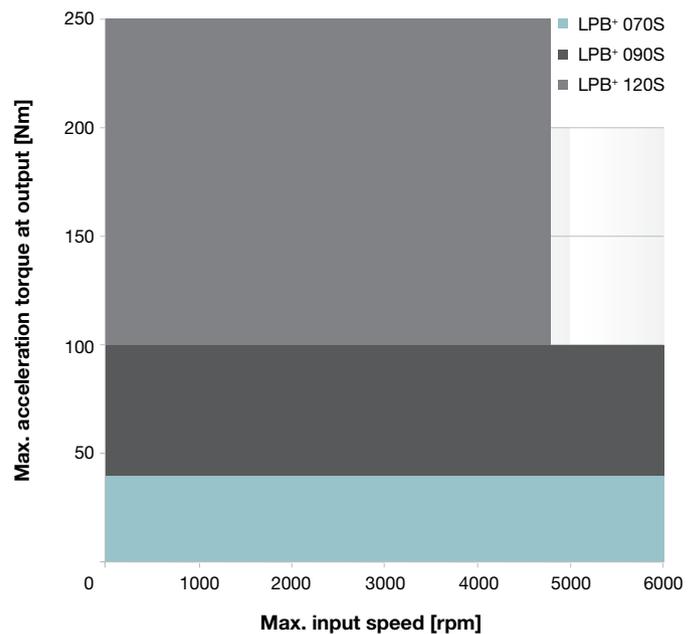

## Quick size selection

**LP+ Generation 3 MF** (example for  $i = 5$ )  
For applications in cyclic operation ( $DC \leq 60\%$ )  
or in continuous operation ( $DC \geq 60\%$ )

**LPB+ Generation 3 MF** (example for  $i = 5$ )  
For applications in cyclic operation ( $DC \leq 60\%$ )  
or in continuous operation ( $DC \geq 60\%$ )

<sup>a)</sup> For higher ambient temperatures, please reduce input speed

<sup>b)</sup> Based on the center of the output flange at  $n_2 = 100$  rpm

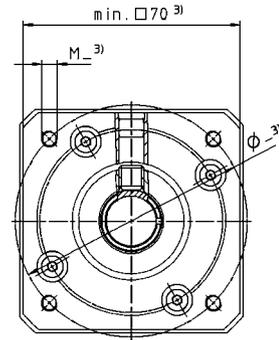

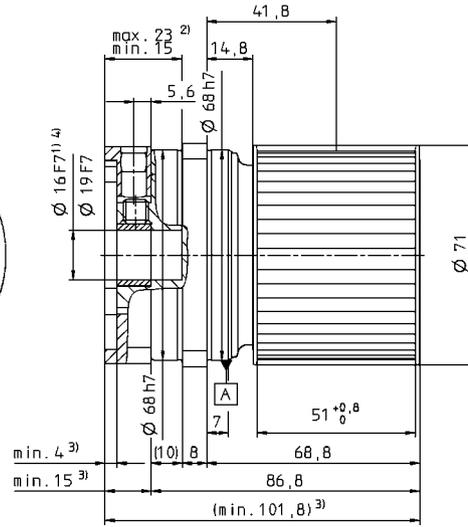

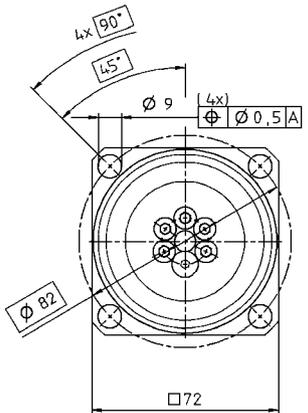

<sup>c)</sup> With mounted PLPB+ belt pulley and 100 rpm

<sup>d)</sup> Other ratios are available on request:  $i = 28$ .

LPB<sup>+</sup> 1-stage:LPB<sup>+</sup> 2-stage:

Supplement: Belt pulley PLPB<sup>+</sup> (not included in the scope of delivery – please order separately)

Illustration: Output flange without belt pulley

Belt Pulley PLPB <sup>+</sup> 120 Profile AT20-0			
Pitch	$p$	mm	20
Number of teeth	$z$		19
Circumference	$z \cdot p$	mm/rotation	380
Inertia	$J$	kgcm <sup>2</sup>	50.62
Mass	$m$	kg	2.61

Non-tolerated dimensions  $\pm 1$ mm

- 1) Check motor shaft fit.
- 2) Min./Max. permissible motor shaft length. Longer motor shafts are adaptable, please contact us.
- 3) The dimensions depend on the motor.
- 4) Smaller motor shaft diameter is compensated by a bushing. Motor shaft diameters up to 38mm available – please contact WITTENSTEIN alpha

CAD data is available under [www.wittenstein-alpha.com](http://www.wittenstein-alpha.com)

Motor mounting according to operating manual
